Significant Upgrades for the 2020–21 School Year

JCQuest for Junior Cycle Science and French has been significantly updated for the 2020-21 school year. Our French Junior Cycle content has been completed, now supporting the full syllabus for second and third year. Our Junior Cycle Science lessons provide full cover of the syllabus. They have also been improved with better questions and more images to support the learning process.

In the continued **Covid-19 emergency** our support to schools has been extended. All our assessment for learning content is available **free of charge** to all schools and students until at least July 2021.

The JCQuest digital assessment solution is designed to support the new Junior Cycle curriculum. **Assessment for learning together with well-designed feedback** has been proven to create a strong learning experience and improve results. The school and classroom **set-up instructions below** will help you get set-up to use JCQuest most effectively with your classes.

Participate in our Erasmus+ Study on Assessment for Learning

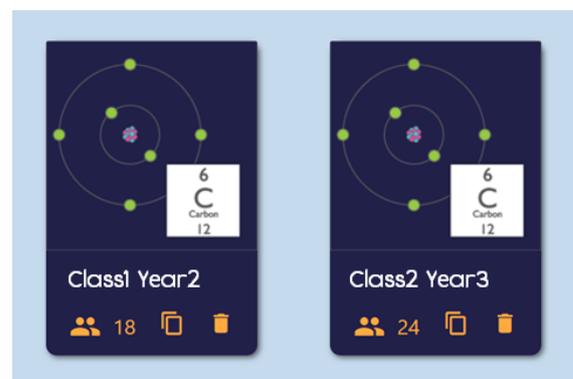

We are also participating in a **five country European Commission Erasmus+ study** on assessment for learning. Schools who are interested in participating in this study will have **full access to JCQuest until July 2022 at no cost**. There will be a very minimal requirement to complete simple feedback. Please email or

phone us at the contact details below to get your school set up for either of these offers.

Set-up your Classrooms in JCQuest

All students and teachers in the country can immediately use JCQuest as **Open Users**. However, when you set up your school and classrooms in JCQuest you will be able to track your students' progress, see if they have completed the lessons, monitor homework, and track performance. Our teacher dashboards will let you see questions that are challenging for students and show topics that need more work in the classroom. To use these features students and teachers simply login to set-up and join the classroom with their own **Google or Microsoft login id**.

To get your classrooms set-up in JCQuest please contact admin@edtech-analytics.com or call **086 829 6471**.

Junior Cycle French:

Our French Junior cycle content has been completed for the 2020-21 school year, now supporting the full syllabus for second and third year.

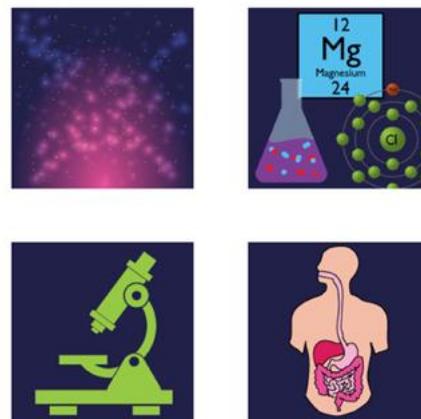

We have created vocabulary and grammar exercises which cover all key topics of the Junior Cycle syllabus. For particularly complicated grammar topics, the exercises take students step by step through a particular grammar point, as well as when and how to use it to form sentences. Carefully designed formative feedback for all questions **nudge the student towards the right answer**, reinforcing basic knowledge while also helping the student develop conceptual understanding. The question sets are ideal for reinforcing knowledge following classroom

teaching, helping the teacher evaluate how well students have understood a topic, and as a reflection or revision tool to prepare for school exams and the Junior Cycle examination.

Junior Cycle Science:

The JCQuest digital assessment for learning solution for Junior Cycle Science is designed to take the student through **all the key topics on the revised curriculum**. Our JC Science materials have been used by more than 20 classrooms around Ireland since our schools closed on March 12th, with many classrooms successfully completing ten or more topics. Carefully designed formative feedback for all questions **nudge the student towards the right answer**, reinforcing basic knowledge while also helping the student develop conceptual understanding.

Our question sets are ideal for reinforcing knowledge following classroom teaching, helping the teacher evaluate how well students have understood a topic, and as a reflection or revision tool to prepare for school exams and the Junior Cycle examination.
